

Whisk Hand Cleaner Dispenser / Refill Installation (04/10/17)

The bracket can be mounted to the wall or any vertical surface using the two screws provided.

After you fill the dispenser **slide it into the top of the mounting bracket and push down until the spring clip slides into the groove on the top of the dispenser**, which will lock the dispenser in place.

To remove the dispenser from the bracket for a refill, **push the spring clip in towards the wall and lift the dispenser** to release it from the mounting bracket.

To load the dispenser, Place the cardboard refill cartridge onto a bench or solid surface. Carefully pry off the metal lid **on top** of the refill cartridge.

Now place the dispenser into the top of the cardboard tube and **gently but firmly press down until the top rim of the cardboard tube is touching the rim of the dispenser**. (the dispenser goes inside the refill cartridge) That will automatically load the hand cleaner into the dispenser.

The spring and the metal clip on the back of the mounting bracket attaches to the **bottom rim of the refill cartridge** to hold it in place when the refill cartridge becomes empty.

To dispense the hand cleaner **put the palm of one hand under the spout**. Place the palm of the other hand on top of the dispenser and **gently squeeze the pump handle**. Be careful it doesn't take much.

Call 785-632-3450 to order refills. Thank You!
